

Haritha Pothamsetty

SAP BRIM FI-CA & Convergent Invoicing Consultant | Implementation & AMS / Production Support

BRIM – CI · FI-CA · SOM · CC | Order-to-Cash | Invoice-to-Cash

Toronto, ON | pothamsettyharitha@gmail.com | 647-895-9053 | LinkedIn: [Haritha Pothamsetty](#)

PROFESSIONAL SUMMARY

SAP BRIM consultant, 9+ years across Convergent Invoicing (CI) and Contract Accounts Receivable and Payable (FI-CA) from SAP Hybris Billing on SAP ERP through to its successor, SAP BRIM on S/4HANA in both implementation and AMS / production support. Three end-to-end FI-CA and CI rollouts delivered across SaaS, financial services, and IoT / digital security, then supported through stabilization, day-to-day issue resolution, and enhancements. Hands-on across the full stack SOM, CC, CI, FI-CA with strong FI-CA receivables, payment settlement, and subledger-to-GL reconciliation. Leads troubleshooting and root cause analysis, writes functional specifications for custom enhancements, and works with global onshore/offshore teams and third-party interfaces such as payment gateways, CRM, and IoT connectivity platforms.

CORE COMPETENCIES

- **BRIM FI-CA & CI support focus:** AMS and production support for SAP BRIM FI-CA and Convergent Invoicing (CI); functional configuration; accounts receivable and payment settlement; FI-CA subledger-to-GL and bank/cash-clearing reconciliation; day-to-day troubleshooting and root cause analysis; CI/FI-CA enhancements and functional specifications.
- **Convergent Invoicing (CI):** Billing classes, billing document types, invoicing variants, Billing Due List, billable item (BIT) processing, invoice consolidation and split, proration, credit memos, correspondence and invoice output.
- **FI-CA:** Document posting rules, account determination, clearing variants, payment lots and returns lots, clarification processing, dunning, receivables and payables, reconciliation keys, subledger-to-GL transfer.
- **BRIM architecture, SOM & CC:** End-to-end BRIM (formerly SAP Hybris Billing) landscape across SOM, Convergent Charging, CI, and FI-CA; Subscription Order Management, Cross-Catalog Mapping, order decomposition; rated-event to billable-item mapping; BRF+ decision logic.
- **Revenue & compliance:** SAP RAR, IFRS 15 / ASC 606, POB identification, SSP allocation, revenue scheduling, contract modifications.
- **Interfaces & integration:** CRM, payment gateways, IoT connectivity platforms, SAP CPI/PO, IDoc, SAP AIF, REST/OData, SAP BTP.
- **Support tooling & delivery:** ServiceNow, JIRA, Microsoft DevOps (ADO), SAP Solution Manager; incident, service-request, and problem management; functional design documentation; Agile (Scrum/Kanban); onshore/offshore coordination.
- **Migration & reporting:** EMIGALL, SLT, LSMW, Data Migration Cockpit; SAP Fiori, Analysis for Office, SAP Analytics Cloud, CDS views, ALV.
- **Industry:** Financial services (banking, asset servicing); IoT connectivity and digital security (telecom-adjacent); SaaS / XaaS high-volume subscription, usage, and fee billing.

PROFESSIONAL EXPERIENCE

Scotiabank June 2021 – January 2026

Senior SAP BRIM Consultant

End-to-end S/4HANA BRIM (CI, FI-CA, RAR) implementation and AMS support for high-volume fee and subscription billing across retail and commercial banking products.

Modules / Tools: BRIM, CI, FI-CA, RAR, FICO · SAP GUI, Fiori, BRF+, SAC, BTP, ServiceNow, JIRA

- Led Convergent Invoicing configuration billing classes, document types, invoicing variants – for high-volume monthly fee and subscription billing across deposit, card, and payments products.
- Tuned Billing Due List parallel processing and selection variants to clear fee runs inside tight month-end windows; cut invoice cycle time by 30%.
- Designed FI-CA posting rules, clearing variants, and payment lots for receivables across millions of customer contract accounts, multi-currency.
- Configured FI-CA payment settlement – payment lots, returns lots, clarification processing and reconciled the subledger to the banking GL via reconciliation keys, clearing bank/cash-clearing accounts to zero at period-end.

- Built CI invoice consolidation to merge fees across products into a single customer statement, with proration for mid-cycle product changes.
- Configured credit memo, fee reversal, and waiver handling in CI for disputed and goodwill adjustments, with BRF+ approval workflows.
- Designed SOM order management for subscription-based banking services, mapping fee-bearing products through Cross-Catalog Mapping into CI.
- Configured the rating-to-billing flow from Convergent Charging into CI for high-volume transaction and account-based fee events.
- Configured SAP RAR for subscription and service-fee revenue recognition POB identification, SSP, BRF+ mapping of FI-CA documents for IFRS 15 / ASC 606.
- Authored functional specifications for custom CI/FI-CA enhancements and fee reports; partnered with ABAP teams through build and test.
- Migrated 5M+ legacy customer billing records into S/4HANA (EMIGALL, SLT) with full reconciliation at cutover.
- **AMS / production support** troubleshoot day-to-day CI and FI-CA fee billing and payment issues, ran root cause analysis, and shipped configuration fixes and workarounds.
- **Incident management:** handled incident and problem tickets in ServiceNow and JIRA against SLAs, with knowledge transfer to L1/L2 to reduce repeat issues.
- **Enhancements:** joined business discussions on enhancements and change requests, turning them into CI/FI-CA designs and minor releases.

Thales Group May 2019 – May 2021

SAP FICO-BRIM Consultant

BRIM CI / FI-CA for IoT connectivity subscriptions and software-license monetization within Digital Identity & Security.

Modules / Tools: FI, CO, SD, RAR, BRIM, CI, FI-CA, GL, AP, AR · SAP GUI, ALE, EDI, BRF+, AIF, Solution Manager

- Configured CI for IoT connectivity subscriptions and software-license monetization, https://www.linkedin.com/jobs/search-results/?currentJobId=4427209727&keywords=SAP%20BRIM%20FICA%20Consultant&origin=JOB_SEARCH_PAGE_LOCATION_AUTOCOMPLETE&geold=101174742 document types and invoicing variants for recurring and usage-based plans.
- Built Billing Due List scheduling for high-volume connectivity-usage billing, consolidating device and subscription charges into customer invoices at month-end.
- Configured FI-CA document types, clearing variants, and payment lots for receivables across multiple currencies and tax jurisdictions.
- Designed BRF+ invoice-split logic by product line, contract tier, and billing frequency.
- Configured Provider Contract and Provider Order structures in SOM for enterprise and channel-partner hierarchies with parent-child billing into CI.
- Built Condition Contract pricing for partner discounts, volume commitments, and tiered rate cards.
- Mapped connectivity and entitlement usage from Convergent Mediation and CC through SAP AIF into the CI billing pipeline.
- Configured SAP RAR (cost-based input method) for multi-year license and subscription contracts, with POB triggers tied to delivery milestones.
- Migrated multi-million legacy subscription and license records into S/4HANA via Data Migration Cockpit with custom ABAP validation.
- **Post-go-live AMS support:** resolved FI-CA-to-GL reconciliation gaps with automated clearing programs, ran root cause analysis on recurring issues, and stabilized day-to-day billing.

Northern Trust September 2017 – April 2019

SAP Hybris Billing / BRIM Functional Consultant

Global-template CI / FI-CA rollout for high-volume asset-servicing fee billing – custody, fund administration, and investment-management fees – carried from SAP Hybris Billing onto S/4HANA as the suite became SAP BRIM.

Modules / Tools: SAP Hybris Billing / BRIM (CI, FI-CA, SOM), S/4HANA FICO, RAR · SPRO, SAP GUI, PI/PO, Solution Manager, Data Migration Cockpit, ServiceNow, BRF+

- Ran global-template workshops to standardize CI configuration for asset-servicing fee billing across international entities.

- Configured CI billing classes and posting rules for custody, fund-administration, and investment-management fees, covering consolidated and split invoice scenarios.
- Designed FI-CA contract account structures, account determination, and clearing for high-volume fee billing across client and fund accounts.
- Configured fee calculation feeding CI for asset- and transaction-based charges (AUC/AUM, transaction volumes, account counts), billed in arrears.
- Mapped rated fee events from Convergent Charging to CI for high-volume billing across custody and fund-services products.
- Built REST/OData integrations on SAP PI/PO and BTP linking upstream client and account systems to SOM and CI.
- Configured SAP RAR (over-time / percentage-of-completion) for multi-year service mandates, with distinct POBs for onboarding and ongoing servicing.
- Migrated millions of legacy fee and account records into S/4HANA (LSMW, custom ABAP) with reconciliation checkpoints at each phase.
- Carried the asset-servicing billing solution from SAP Hybris Billing onto SAP S/4HANA across the 2018 rebrand to SAP BRIM, realigning configuration and global templates to the updated stack.
- Cut fee-invoice cycle time by 25% by tuning Billing Due List orchestration and CI parallel processing.

CA Technologies (India) May 2016 – August 2017

SAP Hybris Billing Consultant

Modules / Tools: SAP SD, FI, MM, SAP SPRO, SAP GUI, Microsoft Excel, SAP Query, JIRA

- Configured and customized core FICO modules (GL/AP/AR/AA) and maintained enterprise structure settings in SPRO.
- Managed financial master data including Chart of Accounts, posting rules, and GL open items.
- Implemented liquidity forecasting and position management supporting global financial operations.
- Ensured seamless integration across MM/SD/PP via functional testing, reconciliations, and defect resolution.
- Supported production environments by resolving FICO tickets, handling enhancements, and improving system stability.
- Performed comprehensive testing cycles (unit, functional, integration) to validate finance processes.
- Configured tax settings (VAT, WHT, tax codes) ensuring compliance with regulatory requirements.
- Delivered end-user training and created operational documentation to enhance system adoption.
- Worked closely with technical teams to troubleshoot complex system issues and optimize performance.
